

AI Research Intern (x/f/m) | NT Parameter Lab

In your role as a Research Intern, you'll design and implement secure machine learning models, delving into innovative technologies and algorithms, with a focus on Large Language Models (LLMs). Your research work is expected to lead to a top-tier conference submission or similar research output. This is a hands-on chance to explore AI safety and make practical contributions to the field of AI.

Benefits

Competitive salary.

Qualifications

- A university degree in AI/ML or related field.
- Experience in NLP, CV, Trustworthiness, Alignment, Privacy & Security, XAI, and related fields.
- Proficiency in programming languages and DL frameworks.
- Research leadership: Lead the field forward through effective communication.
